

Monteggio, Switzerland – 24th November 2025

PRESS RELEASE

Schedio Group Partners with Microsize to Acquire Lonza's Micro-Macinazione Site, Strengthening Europe's Particle Engineering Hub.

Schedio Group, a Swiss-based engineering group specializing in jet mills, isolators, spray dryers, and particle processing technologies, announced a strategic investment alongside Microsize to acquire Lonza's Micro-Macinazione site (Mic Mac) in Monteggio, Switzerland.

This partnership marks an important step in Schedio's long-term vision to bring process technology, equipment design, and GMP manufacturing together into a cohesive model of integrated particle engineering services.

"Mic Mac is an excellent fit with our belief in the 'Power of Together,'" said Mattia Wiedemeier, CCO of Schedio Group. "By partnering with Microsize, we're combining two complementary strengths – Schedio's engineering and equipment expertise, and Microsize's CDMO know-how – to give customers more agility, innovation, and reliability where it matters most."

With more than three decades of experience in GMP-compliant jet milling and micronization, the Monteggio facility adds a solid European base to Microsize's global platform. Upon closing, the two companies plan to invest in upgrading the site's infrastructure, strengthening containment performance, and expanding capabilities for high-potency and complex APIs.

"This collaboration is a natural evolution of what we believe in – making particle engineering safer, smarter, and more accessible," added Milko Leone, CTO. "It gives us the opportunity to support customers all the way from lab-scale trials to full commercial supply, with the same focus on quality and flexibility that defines Schedio."

TJ Higley, CEO of Microsize, said: *"We're thrilled to join forces with Schedio on this next phase. Their technical insight and commitment to innovation make them the perfect partner as we expand our presence in Europe and enhance the value we deliver to our customers worldwide."*

The transaction is expected to close on February 28, 2026, subject to customary closing conditions.

ABOUT SCHEDIO

Situated in Ticino, Switzerland, Schedio SA is renowned for its tailor-made equipment emphasizing bioavailability enhancement and ensuring both product and operator protection. They distinguish themselves with their emphasis on simplicity, robust machine and process support, and an unwavering commitment to safety.

The core philosophy of Schedio revolves around a partnership-centric approach, valuing enduring relationships and aiming to enact tangible enhancements in their clients' businesses.
